

Jomo Brain

Full-Stack Developer

jomobrain1@gmail.com | +254 702 979 697 | github.com/jomobrain1

PROFESSIONAL SUMMARY

Full-stack developer with experience building web and mobile applications using MERN, Laravel, React Native, and related technologies. Enjoys turning ideas into products, from building responsive user interfaces and APIs to implementing authentication, payments, and e-commerce workflows. Strong background in debugging, collaborative development, and delivering practical, user-friendly solutions.

CORE SKILLS

React, Next.js, JavaScript, HTML, CSS, Tailwind CSS, Node.js, Express.js, PHP, Laravel, REST APIs, PWAs, Tauri, React Native, MongoDB, MySQL, SQL, Git, Testing, Firebase, Redis, PostgreSQL

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Phonecare Kenya (Part-Time)

Jun 2025 – Present

Remote

- Developing and maintaining an e-commerce platform using the MERN stack.
- Building responsive, user-friendly frontend features with React for product browsing, cart, and checkout flows.
- Developing backend services and application logic using Node.js and Express.js.
- Managing application data with MongoDB and integrating APIs to support smooth data flow across the platform.
- Improving performance, usability, and reliability through testing, debugging, and ongoing feature enhancements.
- Maintaining a demo/testing deployment for validating e-commerce features and user flows: <https://ecommerce-5hh1.vercel.app/>

Africa Center for Advanced Technology (Contract)

Jan 2023 – Oct 2023

Hybrid

- Trained students at Taveta Vocational College in Android application development.
- Delivered practical instruction in mobile development using Kotlin and Flutter.
- Guided learners through hands-on coding, debugging, testing, and project implementation.
- Introduced core Android concepts including UI design, navigation, and app functionality.
- Mentored students in building functional, user-friendly mobile applications.

Software Developer | Brainverse Technologies

Sep 2022 – Feb 2023

Remote | Nairobi County, Kenya

- Collaborated on the development of client websites based on business requirements and project goals.
- Built a car rental website and implemented booking, ordering, and payment functionality.
- Integrated the Kopo Kopo API to support online payment processing for the car rental platform.

- Contributed to the development of an e-commerce website using Laravel and improved existing features for better usability.
- Supported backend development, debugging, testing, and feature improvements across client projects.

Web Developer Intern | County Government of Kilifi

Oct 2021 – Jan 2022

Hybrid | Kilifi, Kenya

- Supported maintenance and updates for the official county website.
- Debugged technical issues to improve website performance and functionality.
- Recreated the landing page to improve structure, appearance, and usability.
- Added and updated website components, including homepage content and interface elements.

SELECTED PROJECTS

Superfix — MERN Service Platform

Live Project: <https://www.superfixindustry.co.ke/>

- Built a full-stack MERN ecommerce platform using React, Node.js, Express.js, and MongoDB.
- Developed responsive product, cart, checkout, and customer-facing pages for a smooth shopping experience.
- Implemented backend API workflows to support product management, order handling, and ecommerce data operations.
- Created a clean, user-friendly interface focused on usability, performance, and maintainable application flow

Vita Nova — React Native Catholic Mobile Application

Play Store: <https://play.google.com/store/apps/details?id=com.vitanova.app>

Landing Page: <https://vitanova.live/>

- Built and published a React Native mobile application supported by a Node.js backend and MongoDB database.
- Developed mobile features for daily prayers, Catholic readings, reflections, inspirational content, and spiritual resources.
- Created a supporting landing page to present the app, improve discoverability, and guide users to the Play Store listing.

Phonecare Store — MERN E-Commerce Demo/Testing Deployment

Live Demo / Testing Preview: <https://ecommerce-5hh1.vercel.app>

- Built a MERN e-commerce application with product pages, cart functionality, checkout, and order management workflows.
- Developed responsive frontend features with React and connected backend services using Node.js, Express.js, MongoDB, and REST APIs.
- Used the deployment as a demo/testing environment for validating features, usability, and overall application flow.

Notely — Full-Stack MERN Notes Application

[Live Preview](#)

- Built a MERN notes application with authentication, protected routes, and a clean dashboard for creating, editing, and deleting notes.

- Implemented a streamlined note management workflow with a responsive interface and secure access control.

Color CSS — Chrome Extension

[Chrome Web Store](#)

- Built a Chrome extension used by 100+ users to inspect color and CSS values directly in the browser.
- Designed the extension to help developers work faster when analyzing styles and front-end elements on web pages.

SocioApp — Flutter Social Media App

[GitHub](#)

- Developed a Flutter social media application powered by a Laravel API, enabling user registration, profile updates, posting, and commenting.
- Integrated the mobile frontend with backend APIs to deliver a smooth, responsive user experience.

Tailwind Admin Dashboard — Responsive Dashboard UI

- Built a clean admin dashboard using Tailwind CSS for analytics views, management screens, and responsive interface components.
- Focused on reusable UI structure, clarity, and responsiveness across screen sizes.

EDUCATION

Maseno University — Bachelor of Science in Computer Science

Sep 2018 – Apr 2022

Relevant coursework: Data Structures, Algorithms, Databases, Web Programming, Computer Networks, Client-Side Development, Server-Side Development, System Design and Analysis.
